

Press Release

Retresco's rtr textengine and Topic Management System selected as best national digital solutions for the international World Summit Awards in the category "Best and Most Innovative Digital Solution"

Berlin/Salzburg, 29 September 2017

Retresco's [rtr textengine](#) and [Topic Management System \(TMS\)](#) were nominated as the best national digital solutions for Germany by the international World Summit Awards (WSA), selecting digital innovation with impact on society. With this nomination in the Category "Business and Commerce", the rtr textengine and TMS qualify for evaluation by the WSA Online Jury 2017 among 391 international nominations. The World Summit Awards once more showcases to the world the best of digital innovation, from Mexico to New Zealand, from Qatar to Germany.

The WSA nominees 2017 show the richness, diversity, future and innovation of digital solutions on a global scale and prove how digital technology can improve society worldwide.

The WSA 2017 nominees will be evaluated based on seven fundamental criteria: Content, Functionality, Design, Technology, Innovation, Impact and Global/UN value.

The highly competitive WSA nominees have been selected carefully by the WSA National Experts from more than 178 UN member states. The WSA National Experts nominate up to eight solutions from each country – one for every WSA category.

Hence, a nomination to the WSA is already an award in itself – the qualification to compete on an international level and presenting best practice in Business and Commerce nationally.
